EXECUTIVE SUMMARY

Khetan Group, based in Dhaka, is a leading name in sustainable textile solutions and raw-material sourcing for the global textile industry. Through its two flagship arms—Khetan Trading and Fabrics Recycling—the Group is fully committed to innovation, transparency, and environmental responsibility.

Gobindo Khetan

CEO of KHETAN GROUP

At KHETAN GROUP, the focus is on delivering excellence in both trading and manufacturing, fostering a symbiotic relationship between suppliers and customers. We are successful export company selling goods to countries on several continents. The company's dedication to staying at the forefront of industry trends and technological advancements has enabled it to carve a niche as a go-to destination for businesses seeking top-notch raw materials. Whether you're in search of fabrics, fibers, dyes, or specialized materials, KHETAN GROUP offers a comprehensive range that caters to various textile applications.

INTRODUCTION

Situated in the vibrant city of Dhaka, Bangladesh, KHETAN GROUP functions as a dual-purpose establishment engaged in both trading and manufacturing activities. Within our operations, we cater to a diverse range of requirements within the textile industry. This entails providing an extensive selection of raw materials that serve as the fundamental building blocks for textile production processes. Additionally, our offerings extend to encompass shoddy materials, which hold a significant place in the textile landscape.

Our Divisions

Khetan Trading

- Supplies hosiery clips, shoddy, and recovered fibers.
- Global exports across Asia, Europe, and the Americas.
- Trusted by major manufacturers for reliable quality and supply chain consistency.

M/s Fabrics Recycling

- Focuses on recycling Pre-consumer textile waste.
- Uses innovative recycling technologies to create recycled cotton fiber for sustainable textile production.
- Commitment to circular fashion and water conservation by reducing the demand for virgin cotton.

KHETAN
GROUP

ABOUT US

Khetan Group is a Dhaka-based business conglomerate specializing in textile raw materials, garment waste recycling, and recovered fibers.

- Khetan Group focuses on sourcing and exporting shoddy, hosiery clips, fibers, and textile waste worldwide.
- Khetan Fabrics Recycling transforms garment waste into recycled cotton fibers, promoting eco-friendly production and reducing the textile industry's environmental footprint.

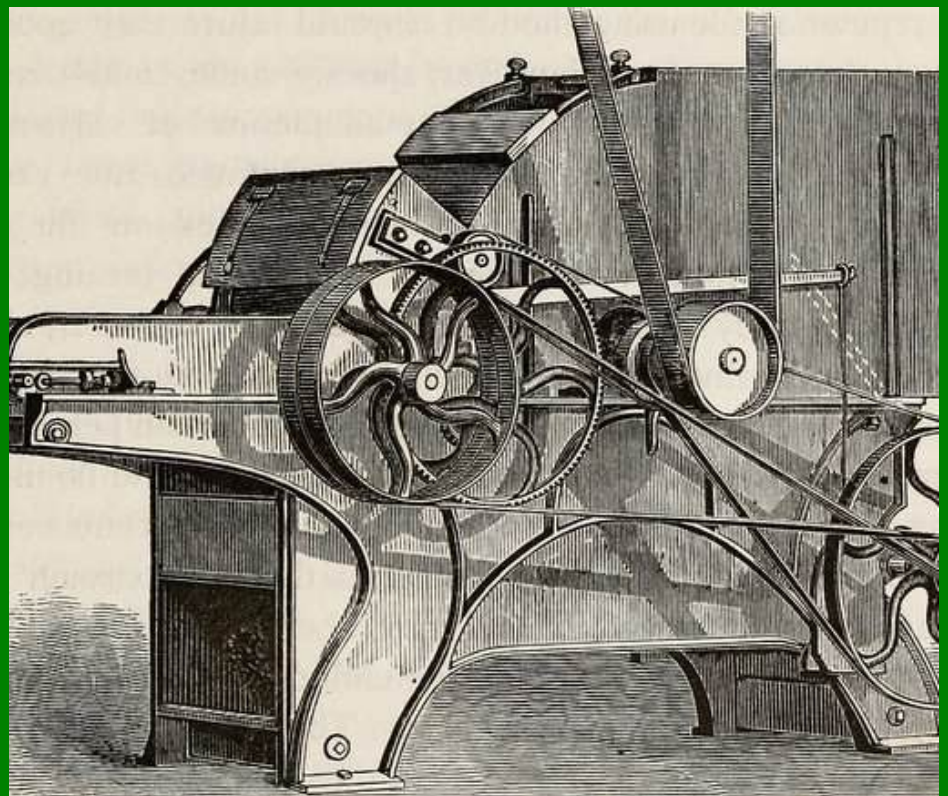

Our vision is to rebuild, reuse, and reclaim textile waste to create a greener future. With an emphasis on innovation and sustainable practices, Khetan Group empowers businesses across continents with raw materials and recycled solutions.

Central to our mission is our unwavering commitment to sustainability. As we deal with a range of raw materials and shoddy products, we recognize the imperative to minimize our ecological footprint. Our aim is to actively contribute to the textile industry's transition toward more eco-friendly practices. By providing recycled and repurposed shoddy materials, we are dedicated to reducing waste and promoting the circular economy, aligning our operations with the global drive for a greener future.

We understand that our success is intrinsically tied to the success of our clients and partners. Thus, fostering strong, collaborative relationships is a cornerstone of our mission. By consistently delivering superior products, exceptional customer service, and tailored solutions, we aspire to become more than just a supplier – we aim to be a strategic partner that empowers businesses to thrive in a competitive market.

Through our comprehensive and strategic approach, we seek to catalyze positive transformations within the textile industry. By enabling businesses to access the finest raw materials, facilitating sustainable practices, and embracing innovation, our goal is to contribute significantly to the industry's growth and evolution. In achieving this, we envision a future where KHETAN GROUP stands not only as a beacon of excellence but also as a driving force behind the advancement of the textile industry, both locally and globally.

KHETAN
GROUP

HISTORY AND MILESTONES

2003–2013

Building Foundations and Industry Recognition

KHETAN GROUP establishes its foothold in the market, offering unparalleled service, top-notch products, and competitive pricing. During this initial decade, the company garners attention for its commitment to quality, attracting partnerships with renowned enterprises in various sectors.

2014–2016

Expansion Across Borders

KHETAN GROUP extends its reach beyond national boundaries, exporting its diverse product range to prominent global markets, including India, China, Türkiye, Europe, and Mexico. This geographical expansion showcases the company's capabilities and underscores its position as an international contender.

2017–2019

Customer Trust and Satisfaction

The unwavering commitment to fulfilling promises and maintaining quality earns KHETAN GROUP the trust of its valued customers. Satisfied clients vouch for the company's dedication, determination, and unwavering focus on excellence, reinforcing its reputation as a dependable and reliable partner.

2020–
Present

A Legacy of Success

Launch of Khetan Fabrics Recycling, pioneering large-scale recycling of textile waste into high-quality fibers.

Future
Milestones

KHETAN GROUP envisions further strides on the horizon. Building upon its foundation of service, quality, and competitive pricing, the company aspires to forge new partnerships, explore emerging markets, and innovate in ways that redefine industry standards.

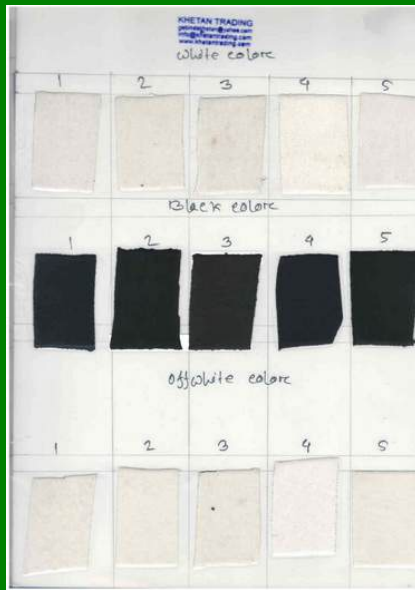

This remarkable journey of KHETAN GROUP since 2003 has been marked by consistent growth, global recognition, and a steadfast dedication to its core values. As the company looks ahead, its legacy of success continues to unfold, leaving an indelible mark on the businesses it serves and the industries it transforms.

OUR FACTORY

What we do at our Factory

Located in **Dewaliabari, Konabari, Gazipur, Bangladesh**, the Pure Waste factory stands as a beacon of sustainability in the heart of the textile industry. Our operations are not only centered on recycling textile waste but also extend to the responsible collection, sorting, and packaging of our products. With a commitment to environmental well-being and innovation, we have established a unique approach to manufacturing and packaging that aligns with our core values.

Collection and Sorting:

At our Dewaliabari factory, we uphold the essence of responsible recycling. We collect textile waste clips from door-to-door, ensuring a localized and efficient process that reduces transportation emissions. These clips are meticulously sorted by color, reflecting our attention to detail and dedication to producing high-quality, sustainable products.

Export-Standard Packaging:

We firmly believe that packaging plays a crucial role in ensuring the safe transit of our products to their intended destinations. Our packaging standards meet and exceed international export norms, guaranteeing that our products remain in pristine condition while minimizing the impact on the environment. By focusing on sustainable packaging materials and design, we prioritize the reduction of waste and the conservation of resources.

Measuring Profits by Planet's Well-Being:

Our factory's success is not solely determined by financial gains, but rather by the positive impact we make on the planet. Our commitment to the well-being of the environment shapes every aspect of our operations, from collection to packaging. This philosophy guides our decisions, propelling us toward a future where sustainability and prosperity are intertwined.

In conclusion, the Pure Waste Dewaliabari factory stands as a testament to sustainable manufacturing, packaging excellence, and environmental responsibility. We are proud to contribute to a circular economy, to reduce textile waste, and to champion the cause of environmental well-being. Our commitment remains resolute – to measure profits purely by the well-being of the planet, leaving a legacy of positive change in the textile industry.

RECYCLING & INNOVATION

***You might see waste,
we see circular solutions.***

Textile waste is our raw material, and we use it to create high quality recycled cotton fiber. Innovative technologies like Recover™ have the capability to turn textile waste (industrial waste and used garments) into high-quality recycled fibers that can be used again to create new garments, closing the loop on fashion.

At pure waste, we measure profits purely by the well being of the planet. We use textile waste or valueless material and recycle it into sustainable products. We chose to concentrate on cotton because it's the most used, yet least recycled fabric and it demands an unbearable amount of water to grow. we are proud that our work helps to make the planet more sustainable.

CORPORATE SOCIAL RESPONSIBILITY

At Pure Waste, our commitment to Corporate Social Responsibility (CSR) is woven into the fabric of our identity. Guided by the principle that true profit is measured by the well-being of the planet, we have taken concrete steps to create positive change and contribute to a more sustainable future.

Recycling for Sustainability: Our core mission is to transform textile waste and valueless materials into sustainable products. By rescuing discarded materials, we reduce the burden on landfills and minimize the environmental impact of textile waste.

Addressing Cotton's Environmental Impact: We recognize the challenges posed by the textile industry, particularly in the case of cotton. As the most used yet least recycled fabric, cotton demands an immense amount of resources, including water. By focusing on recycling cotton, we actively tackle the environmental issues associated with its production.

Water Conservation: Acknowledging the excessive water demand of cotton cultivation, we are committed to conserving this precious resource. Through our recycling efforts, we contribute to the reduction of water consumption in textile production.

Circular Economy Advocate: Our approach aligns with the circular economy model, where materials are continuously recycled and repurposed. By championing this model, we promote a regenerative cycle that minimizes waste and maximizes resource efficiency.

Empowerment Through Education: We believe in empowering individuals with knowledge to make sustainable choices. Through educational initiatives, we aim to raise awareness about the environmental impact of textiles and inspire more responsible consumption.

Future Aspirations: As we move forward, our dedication to CSR remains resolute. We aspire to expand our reach, influence, and impact, setting new standards for sustainable textile practices while inspiring others to join us on this journey.

At Pure Waste, CSR is not an option; it's our responsibility. By transforming waste into valuable resources, championing sustainability, and actively contributing to positive change, we're proud to be a catalyst for a more planet-friendly textile industry.

OUR SAFETY AND SECURITY

Employee Safety:

We provide comprehensive training to all employees involved in the recycling process, ensuring they are well-versed in handling waste materials and operating machinery safely. Personal protective equipment (PPE) is made mandatory for all staff working in potentially hazardous areas. This includes items such as gloves, masks, and safety glasses to minimize exposure risks.

Material Handling:

We follow strict protocols for the collection, sorting, and transportation of textile waste. Proper handling minimizes the risk of accidents and exposure to harmful substances.

Recycling Process Safety:

Our recycling processes are designed with safety in mind. We use advanced machinery equipped with safety features to prevent accidents and mitigate potential risks.

Environmental Protection:

Our focus on sustainability aligns with our commitment to the environment's safety and security. By recycling textile waste, we contribute to reducing the burden on landfills and conserving resources.

Water Conservation:

Our decision to focus on cotton recycling aligns with our concern for environmental security, as cotton cultivation demands significant water resources. By reusing cotton, we help alleviate the strain on water supplies.

Fire Detection and Suppression Systems:

We employ state-of-the-art fire detection systems that use sensors to identify the presence of smoke, heat, or flames. These systems provide early warnings, enabling swift responses to potential fire hazards.

Emergency Response Plans:

Comprehensive emergency response plans are in place, outlining step-by-step actions to be taken in the event of a fire. These plans include procedures for notifying emergency services, evacuating personnel, and containing the fire to prevent its escalation.
